

ATMOSPHERIC PRESSURE ISOLATOR

Provides consistency for improved data quality when deploying 3T seismometers in permanent installations.

The Atmospheric Pressure Isolator protects the sensors from very slight fluctuations in temperature and pressure that can affect the instrument self-noise.

A cable and connector in the lid allows the 3T to be fully isolated with a rubber seal ensuring an air tight fit between the lid and the tube.

SPECIFICATIONS

PHYSICAL

Material	Mild Steel
Finish	Powder coat gloss white
Dimensions (H x W x D)	388 mm x 220 mm Ø
Weight	15 Kg
